Claresholm Local News

Mrs. Brooker is on the sick list this week.

Dr. Hyman has bought a new Oakland car from the Claresholm Garage.

Orison Wallace, of Gratum, was admitted to the local hospital on Sunday last.

Born, at the local hospital, on January 22nd to Mr. and Mrs. W. G. Davis, a daughter.

Monte Blue in "One Round Hogan" at the Rex theater next Monday and Tuesday.

Born, at the local hospital, on January 21, to Mr. and Mrs. Martin Hustad, of Gratum, a son.

Col. W. A. Lyndon and Mrs. Lyndon were in Calgary last week attending the Old Times' annual ball.

Stanley Wyatt's rink reached the jewelry stage in the Burns trophy competition at the Calgary bonspiel last week.

Jean, nine months old daughter of Mr. and Mrs. Donald Douglas of Gratum, was a patient in the local hospital on Thursday.

Nominations for town councilors and school trustees will take place on February 6th. Election, if necessary, one week later.

The Catholic Women's League will hold a valentine tea and sale of home cooking in the Odd Fellows' hall on Saturday, Feb. 18.

A. E. Runions, auctioneer, advises that he will return to Claresholm about February 1st, and will be ready to handle all sales.

Although a moderate chinook has been blowing, the indications are for fair bonspiel weather for the opening of bonspiel here next Monday.

Tom Benson, Eric Harvey and Alf McAlister, motored to Calgary a business trip on Wednesday, returning Thursday. They report the roads in fair condition.

Thursday was the date set for the first 1928 sitting of district court at Claresholm, but no sitting was held, as there were no cases to come before the court.

The five year old son of Mr. and Mrs. Louis Norgard died on Thursday, of croup. The funeral service will be held in the Lutheran church on Sunday afternoon at 2 o'clock.

"The Magic Garden," from Jean Straton Porter's latest novel, with Margaret Morris and Raymond Kane, at the Rex theater Friday and Saturday nights this week.

J. R. Watt has been in Winnipeg this week, attending the annual meeting of the Western Canada Thoroughbred Horse Breeders' Association. He returned home Thursday night.

The Claresholm Ladies' Curling Club was organized on Tuesday with twelve rinks. Officers were elected as follows: Mrs. Mackintosh, president; Mrs. Wyatt, vice president; Mrs. King, secretary-treasurer.

Nils Dahl had the misfortune to have his right arm broken one day last week. He was driving a load of grain from the field when the rough ground shook him from the load, his arm being broken in the fall.

Several Claresholm Elks paid a fraternal visit to Staveland lodge on Tuesday night, the occasion being installation of officers of Staveland. Elks from other towns were also present. The visitors were royally entertained.

The Alberta Sunshine Club will give a dance on Friday, February 3rd, in the Odd Fellows' hall. Dancing starts at 9 p.m. Music will be furnished by a good three-piece orchestra—violin, saxophone and piano. An added attraction will be mind-reading by Mrs. Gimes during lunch time. Admission, including supper, \$1.50 per couple, extra lady 50c.

COMMUNITY DAY COMPLETE SUCCESS

Captain Dancy had a very busy day here Thursday carrying out the community day program, sponsored by the Elks. In the forenoon he spoke before the upper grades of the schools and in the afternoon before the students of the School of Agriculture, meeting with a good reception in both instances.

There was a fine turnout for the meeting of the ladies organizations in the afternoon at Harrison Hall, and his address here was also well received.

The Board of Trade meeting at noon is reported elsewhere in this issue.

The Rex theater was packed to capacity for the community gathering in the evening, when Captain Dancy delivered an eloquent and logical address in the interest of Canadianization. The address was enlivened by several humorous anecdotes.

In the course of his talk Captain Dancy paid high tribute to the boys' and girls' organizations, such as the Boy Scouts and C. G. I. T., both of which organizations were represented on the stage by local units. He made it clear that these organizations are doing a great work in making the boys and girls into better men and women.

He was convinced that the only way to prevent another great war is to conscript capital as well as men; if it were known that capital would certainly be conscripted in case of war, then there would be no war.

He held that the policy of allowing foreigners to settle here in colonies, retaining their citizenship, language, etc., is all wrong. They should be compelled to learn the English language and become naturalized. And something must be done to keep our Canadian born people at home; at least twelve millions of the cream of Canadian manhood are now residents of the United States; a way must be found to keep our native sons in Canada.

Captain Dancy commended the purpose of the Elks to place a Canadian flag in every school room in the Dominion. The address was preceded by a fine musical program, which included several numbers by the Claresholm Band; vocal duet by Mr. and Mrs. Laurie, solo by Mr. Cormack, and several choruses from the "Chimes of Normandy." All together a high class musical program.

FIRE IN CLARK BROS. GENERAL STORE

About 8 o'clock on Thursday evening, W. McKenzie, when passing Clark Bros. store, noticed smoke issuing from the building. He immediately gave the alarm. On entering it was found that the upstairs was full of smoke, and a pile of mattresses were found to be on fire. These were quickly thrown out of the window into the street and nothing else caught fire.

The origin of the fire is unknown. The damage from the smoke is undoubtedly considerable. The loss is covered by insurance.

It was fortunate indeed that the fire was discovered in its incipency, otherwise the loss might have been very heavy.

Manager Edlund, of the Rex theater, has announced that the great spectacular picture, "Ben Hur," is booked to appear here February 13, 14 and 15. This picture has just finished a three days return engagement at the Grand Theater, Calgary, where it has drawn big houses twice daily.

Moderate winter weather has prevailed here during the week, with about two inches of snow on Sunday. A chinook set in on Thursday morning and continued through today.

United Grain Growers, Limited Twenty-Year 5% First Mortgage Bonds

Due January 2nd, 1948

These Bonds offer an attractive opportunity for investors and would particularly appeal to residents of Western Canada because of their familiarity with the business of United Grain Growers, Limited, and the success that has attended its operations during the last twenty-one years.

The new issue of \$3,750,000 First Mortgage Bonds is for the purpose of retiring outstanding obligations and of re-investing the Company for expenditures in connection with the newly completed 5,500,000 bushel elevator at Port Arthur and the recent acquisition of certain country elevators.

The Bonds are adequately secured by assets, while, for five years ended August 31, 1927, net earnings available for interest and depreciation have averaged more than 4 1/2 times annual interest requirements on all Bonds to be presently outstanding.

Bonds may be obtained in denominations of \$50 or \$100. Principal and half-yearly interest are payable in any branch in Canada of The Royal Bank of Canada.

Price: 96.25 and interest, yielding over 5.30%

Full descriptive circular will be gladly furnished upon request.

Britain Forges Ahead

These prophets of gloom who have been predicting the rapid decline of British power and prestige throughout the world, and those who have said that such a catastrophe will be the father of the thought, must surely be beginning to realize that they will have to revise their opinions and recall their predictions. For evidence accumulates, and that is being told upon fact, which go to demonstrate the vitality, prestige and power of the Old Land and the Empire as a whole.

Notwithstanding the fact that Germany was particularly bitter against Britain for entering the world war, and using its hymn of hate because it realized that the British entry into the conflict spelled defeat for Germany, it is a fact today that a more friendly feeling exists in Germany towards Britain than there is entertained for any other nation which was allied against her.

For a time the anti-foreign feeling in China was interpreted as being largely an anti-British feeling, for the cultivation of which Soviet Russia was largely responsible. But the inevitable reaction has now set in as the true designs of Russia and the true nature of British policy is becoming disclosed and understood.

At the meeting of the Institute of Pacific Relations held at Honolulu last July, Sir Frederick Wyke, chief unofficial spokesman for Great Britain, presented a memorandum on the history of Anglo-Chinese relations from the time of Lord Macartney's mission in 1783 down to the famous communique of Sir Austin Chamberlain of a year ago. This memorandum dealt fairly with the mistakes made by both nations, and it demonstrated from the past acts of Great Britain that the conciliatory attitude of Sir Austin Chamberlain's document was a logical outcome of the facts.

It is interesting to recall at this time, when the Nationalities of China are breaking off diplomatic relations with Soviet Russia, the manner in which Sir Frederick Wyke's memorandum was received by the Chinese Nationalist delegates to the Honolulu conference. These delegates had distinguished in advance a printed case against Great Britain, which was replete with sharp statements on British foreign policy. But when Sir Frederick presented the other side, as impressed were the Chinese delegates by its fairness and by the British point of view that they requested their own document and asked for the return of the copies distributed. This is hardly a sign of British weakness in world affairs, or an evidence of loss of prestige. The fact that anti-British feeling in China is grinding to a halt is a very real fact.

Surely and steadily Great Britain is regaining her position as the financial centre of the world. The pound sterling has returned to par, even in New York, and the flow of gold, which has been almost continuous to the United States for many years, has recently been effected in the first gold shipment from New York to London. Great Britain continues promptly on its date to make her enormous payments to the United States on account of war obligations, and with every payment made her position becomes stronger.

British financial institutions and industrial concerns are more and more regaining their position in world markets, and whereas during the war British investments and securities in foreign lands and in the overseas Dominions had to be withdrawn in order to carry on the grim struggle, British investors are again active throughout the world.

As carriers of the commerce of the world, and the great commercial clearing house for all nations, Britain remains supreme, fit for battle, despite all the efforts of other nations. Britain retains the leadership by a wide margin.

And to this general improvement in position the overseas Dominions of the Empire, led by Canada, are contributing an ever increasing share.

Prince of Gypsies Buried in Splendor

Thousands of Delegates Attended

Funeral in Czechoslovakia

Dressed in medieval splendor, Horvath, Prince of the Gypsies, has been buried in his grave in Hungary.

Czechoslovakia, while thousands of Central European gypsies mourned at his loss.

His coffin was of ebony and his body dressed in rich silk brocade. In his hand was a whip to symbolize mastery over horse and wife, while at his side were wine and liquor bottles so that he might treat his old friends in Lintol.

At least a thousand delegates from

Burgundian, Hungarian and Rumanian gypsy tribes attended the funeral, headed by 30 musical bands, most of them on horseback.

Medical Clinics in Egypt

Government Using Modern Method To

Quell Old Disease

American aid is to be enlisted to fight anti-modern plague in Egypt, says a bulletin.

The Egyptian Government has purchased terms with the Rockefeller Foundation for the establishment of

Egypt of clinical stations for treatment of intestinal and parasitic diseases. The Foundation will pay the salary of an American sanitary engineer, who will be provided by the Rockefeller Foundation with a staff, office and accessories, and the Government will exempt from customs duties all imports from the United States required in the prosecution of the work.

Call a man a diplomat instead of a liar and he will be well pleased; but it amounts to about the same thing.

The thoughts of a music composer should be noteworthy.

Titled Tax Drivers

Many Russian Nobility Are Chauffeurs in Paris

There was a time when the Paris tax drivers were simply bachelors of art and candidates in philosophy.

This has all changed. They are now Counts, Dukes, Marquises, Colonels and Generals. The Russians have aristocratized them. But there are many genuine Russians among them. They may be picked out by their gracious manners, their broad smiles, their ignorance of the city ways and I believe they occur by St. Anastasia instead of a real Gallic Saint. Indignant Vox Populi has written to the papers recently that these Russian ex-Grand Dukes and Cossack Hetmans are not only ignorant of the Paris labyrinth, but that they refuse to learn their geography. One lady reports that the driver took her for a long ride, altogether out of the direction of the address she had given, and persisted in looking around at his charge with a broad smile. As he kept up a brisk pace and a brisk pace in Paris means something else, did not venture to jump out. Finally they were halted by a signal at a crossing. The lady called a gendarme. "What do you mean by asking the driver of the chauffeur, 'Don't you know the streets?' " "Sir," replied the ex-Grand Duke, "your Commanche-Chief has never seen the plan. How can I advance without an map?" A phrase reminiscent of the Russian front, perhaps.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which relieves the bowels, sweetens the stomach, drives out constipation and indigestion, breaks up the colic, soothes simple fevers and promotes healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe, as they are absolutely guaranteed free from any other injurious drug.

Concerning the Tablets, Mrs. Alex J. Allen, of Atlanta, Ga., writes: "I have always kept Baby's Own Tablets in my home, and I have never even found them a perfect medicine for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Farmers Lose Money

Better Handling Of Cream Would Reduce Losses

Saskatchewan farmers lost considerably more than \$50,000 during the ended October 31 as a result of the loss of cream, according to Percy E. Reed, dairy commissioner for Saskatchewan, broadcasting a lecture under the auspices of the Saskatchewan Farmer Radio Farm School.

Better handling methods would have saved a good deal of this loss, Mr. Reed declared. During the period under review there were 83,000 cases of cream graded No. 2 or "off" because of high acidity or the presence of other undesirable foreign factors. This, however, only provided for 12.5 per cent. of the total output, the remainder, 86.5 per cent. grading No. 1 or better.

Of the total amount graded down 15.6 per cent., or 12,544 cases, was put down because of bad flavors in the cream and French weed, or stink weed as it is more popularly known, was largely responsible for this.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are easy to take that the most delicate stomach can assimilate them and welcome them as speedy cures of pain, because they promptly remove the worms that cause the pain, and thus the suffering of the child is relieved. With so startling a remedy hand no child should suffer an hour from worms.

The Destruction Of Wolves

As a result of the efforts of the North West Territories and Yukon Branch of the Department of the Interior, Canada, 981 wolves were destroyed during the last recorded year by natives and white men.

More than half the people in the world live in Asia, so he has been the fourth of the earth's surface.

Cancer Research

Investigations Carried On In England For Quarter Of A Century

The 25th annual report of the Imperial cancer research fund recently issued in London, tells a story of a patient investigation which for a quarter of a century has been in progress. Unhappily there is as yet no indication that the goal of the work is in sight.

Dr. Murray, the director of the fund, talks at some length in the report with the disputed question whether or not cancer is a solitary invader of the body—that is to say, whether or not two or more cancers can begin together and co-exist as in, for example, warts. Dr. Murray believes that the evidence he has obtained justifies him in accepting the "solitary" view. This is a matter of some importance because if it be true that a second cancer cannot easily grow in a body in which a cancer is already established, then presumptive evidence exists that the body does make an attempt to rid itself of cancer, and hope is engendered of being able some day to make use of this natural healing power.

Many Radio Users

200,000 Radio Licenses Issued In Canada

Radio licenses issued throughout Canada to the end of November slightly exceeded 200,000 and it is estimated that those listening in aggregate a million. The licenses issued, it is believed, do not represent more than half of the users and a campaign is now on against the delinquents.

Of the total licenses by provinces the figures show that Ontario has 102,449; Quebec, 41,270; Saskatchewan, 18,713; British Columbia, 11,613; Manitoba, 14,192; Alberta, 9,242; Winnipeg, 7,531; Vancouver, 6,286; Victoria, 2,832; Prince Edward Island, 253; Toronto has 33,880 issued licenses; Montreal, 27,882; Ottawa, 6,968; Windsor, 6,341; Hamilton, 6,482; St. John, 822 and Halifax, 1,484.

The Crown Asylum Borneo. Since asthma selected there has been such lack of much heralded remedies, but the Crown Asylum Borneo, lives and worthiness. The ever-growing reputation of the Crown Asylum Borneo has given it a place in the field of medicine which no other can approach. It has never been judged by sensational methods, but has simple means of effecting relief and making new converts.

The Wonder Of Dry Ice

New Product Evaporates Slowly and Leaves No Liquid

In a recent electrical exhibition in New York, a castle was shown made of dry ice. One of the wonders of the new product was that it did not melt any liquid as it slowly evaporated. It is solid carbon dioxide which has been frozen to a temperature of 109 degrees below zero.

The principal use of dry ice is for the refrigeration of perishable foods in transit. This may be a pint of ice cream which the housewife is carrying home from the store, or a refrigerator car of fruit speeding from the west coast of Canada.

To carry home the ice cream, the pint package of the cream is placed in a slightly larger paper package which permits a piece of dry ice to lie against the package of cream. On arriving home the housewife can leave the package of cream standing on a table for six hours because the dry ice lasts that long.

Next summer on those hot days you can carry a piece around in your pocket and keep cool.

A Wish For Lindbergh

The youth of a country might be worse employed than in admiring the Lindbergh type of character. Canadians should be inspired by his courage and prayer that Lindbergh may come safely to the end of his every aerial night and live in health, joy and wealth, to die in bed at a great old age.

London has a tipical hotel. Patrons are firmly but courteously notified that it is against the rules of the hotel to offer tips. The servants are well paid, and consequently the tip-mongers are always at a premium.

A short walk daily will benefit any man in the long run.

Tibet Closed To Foreigners

People Are Angry Over Statements Made By Explorer

The secretary of the Royal Geographical Society is unable to confirm the statement made by Captain Odell in New York that a new expedition to climb Mount Everest was being organized. Captain Odell was a member of the society's 1924 expedition.

The India Office states that the next expedition to Mount Everest will not be made for some time, owing to the anger of the Tibetans at statements made by an explorer following his return from a secret trip to Tibet. This explorer is said to have exhibited on European lecture platform two Tibetans, an old man and a young man, as priests of the Dalai Lama, ruler of Tibet. When these statements drifted back to Tibet the Lama was so outraged that he refused to permit any more foreigners to visit the country. Under an agreement with the British officials in India foreigners are kept back from the gateway to Tibet by the British.

The latest explorer is said to have broken his word to the British, coming the Lama to lose confidence in him and to deny entrance to all foreigners.

At that time the British Government was negotiating with the Lama in behalf of the Royal Geographical Society which desires to continue the exploration of Mount Everest. The society was forced to postpone the expedition, but when the Lama again decided to receive visitors to his mysterious country, they will probably be the first guests.

The India Office said no negotiations were being carried out at present, but it received an inquiry some time ago from a German explorer connected with the expedition. The report was at the steps necessary for making the trip by way of British India.

For Both House and Stable.—There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and minor ailments, both human beings and the lower orders of animals.

Even the man with a lot of gossip about him can't resist the temptation to remain under the covers for 30 minutes after the alarm clock goes off.

Whether the corn be old or new growth, it must yield to Johnson's Corn Remover.

A Paving Operation

Picking off wet weeds off cotton sometimes is a more lucrative than picking the cotton itself. J. R. O. Lindsey, Richmond, Va., recently shipped 72,000 of the weeds to the Florida State Agricultural College at \$2.50 a thousand. At that rate a fast picker could earn \$10 a day.

The number of bicycles used in France in 1926 amounted to 7,112,200—ten times the number of automobiles in use during the same year.

Home workers in Saxony receive less than 24 cents for stitching 1,000 buttons. The machine makers, according to a new wage scale.

Last year the company earned profits of approximately \$14,000,000.

The freight bill last year was \$2,600,000, or 1 per cent. of the total freight paid in Canada.

Eight million dollars were paid out in wages, or approximately \$1,000 per hour. Added to this the cost of supplies would bring the expenditure to almost \$3,000 per hour.

Increased Home Consumption Of Milk Products Is Cause Of A Decrease In Exports

The totals just issued by the Dominion Bureau of Statistics for the year ending with November show a decrease in the exports of milk products as compared with 1928. On the other hand there has been an increase in the imports. These figures follow a recent announcement that there were 50,000 more milk cattle than there was a year ago, and, at first glance, indicate that the Canadian dairy cow is not as efficient as she used to be.

The experts of the department of agriculture, however, comment on the decrease of the cow and give a number of reasons for the present situation. There has been a great increase in the domestic consumption of milk and milk products in Canada during the past year. It is estimated that there are 100,000 more people here than there were a year ago, and the experts say it takes 2,000 pounds of milk a year to supply one person with milk, cream, butter and cheese, so there is one hundred million pounds accounted for. Of course the more used at home, the less there is to ship abroad.

Canadians on the average are using more cheese and butter than in previous years. Better advertising of the butter consumption and advertising campaigns have increased the use of cheese as well as making in the houses a more uniform type of cheese. Dr. Huddell, dairy commissioner of the department of agriculture, estimates that the production of butter, taking the Dominion as a whole, was about equal this year to the year previous. There was a shrinkage in the yearlies and an increase in Ontario and the east. When there are the best wheat crops in the west the pasture there do not seem to give as much milk as in dairy farming as when the cereal growing is less profitable.

The total amount of exports this year was \$7,714,000, valued at \$1,094,694, whereas the year before it was \$6,034,000, valued at \$1,358,760. On the other hand Canada imported \$3,503,833 worth of butter this year and \$3,234,630 the year before. In cheese the export figures are not far behind last year. The value of Canadian cheese exported for the 12 months ending with November was \$2,670,000 and the year before at \$2,514,000. In volume the exports compared 1,102,888 cwt. and 1,334,000 cwt. Canada imported 1,334,000 cwt. worth of cheese in the last 12 months and \$120,474 the year before. Most of the Canadian cheese went to the United Kingdom.

Captain Did His Best

Even If He Could Not Carry Out Orders

Lord Howard, Lord Chief Justice, told this story at a Liverpool Shipbuilders' dinner. His Lordship was delayed by the fog which for several days hung over most parts of the country.

"It reminds me," he said, "of a story once told me by the captain of a great liner. When he was second mate they were coming at Valparaiso and the captain showed him a telegram he had received from the owners: 'Move heaven and earth to get to Sydney.'"

The captain sent the following reply: 'Heaven and earth not available. Raising hell. Things are moving.'

Score Higher If Together

During studies of twins and their mental traits, Prof. H. H. Newman of the University of Chicago, found that identical twins act unaturally if examined separately. When matched, the written tests they scored much higher if they were together although not in actual communication. He also found that finger prints of identical twins are alike.

Motoring, says a St. Louis authority, is good for the health.

Right.

Only pedestrians get run down!

"Look that dog belong to you?"
"Well, it is certainly much like you!"
Kirkland, Vienna.

New Garden Plums

List Of Varieties That May Be Successfully Grown

Plums can be successfully grown in many parts of Canada, but a careful selection of varieties suitable to the district in which they are to be grown is essential. Where the size of a garden will permit of tree fruits the growing of plums is an interesting and profitable undertaking for the amateur, and all the more so at present since with the development of a large number of new hybrids there are available several superior kinds for parts of Canada hitherto forced to grow poorer varieties. In this connection, a bulletin on "Fruit Culture," available at the Publications Branch, Department of Agriculture, Ottawa, gives lists of plums suitable for different districts, with full descriptions of the different varieties. Among the new Japanese-American crosses, Katsunaka and Waseana are very good, quality, large in size, dark red, with firm yellow flesh and tender skin. These two, with Omaha a very early sort and Emerald, a late plum, are worthy of a place in a small garden. Of the Japanese and Seed Cherry hybrids, from Tamao, Cherry is outstanding. It is not really a cherry but a plum growing on a low bush, and especially adapted for prairie conditions, yet worthy of trial in the East. Of the older varieties, the old standby varieties like Greengoose, Cox's Orange and Dancow still constitute the main class for culinary purposes and should have a place in any garden where the climate is not too severe. Of the American group, Baby, Cheney, Terry, and Mammoth offer the best selection. They are not useful for the kitchen, but they provide excellent material for jelly making.

Gas Marks For Males
Fumes of hydrogen-sulphide gas pouring from the oil wells of the Crane-Upton field have proven so dangerous that women and animals have been provided with gas masks. Males submitted to the mask with better grace than did the women. Because the gas is almost odorless it is necessary to wear the protectors constantly.

Winnipeg Newsleader Union

An ambitious taxidriver of Berlin posted a handwritten notice in English between the two front windows of his cab so that his fares, while luxuriously rolling on the back seat, might be read.

A Smartly Simple Trick

This smartly simple trick will be useful suitable for all daytime wear. The bodice opens at the center-front, and is joined to the skirt, having two plaits at each side of the front. There is a belt across the one-piece back, and buttons adorn the front and pointed cuffs on the long tight-fitting sleeves. No. 1600 is in sizes 31, 36, 38, 40 and 42 inches bust. Size 38 requires 2 1/2 yards 39-inch, or 2 1/2 yards 44-inch material. Price 50 cents the pattern.

The secret of this smartly simple dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the design illustrated in our new Fashion Book to be practical and simple, yet very attractive. It is the latest of the moment. Price of the book 10 cents the copy.

Open Roads In Winter

Movement Is On To Make Motor Traffic Possible Year Round

While the efforts which are being made by businessmen in the more important cities and towns of Saskatchewan in co-operation with some of the neighboring municipalities to keep open main traffic roads during the winter months are quite laudable, such volunteer efforts will not afford a permanent solution of the problem. The time will come, no doubt, when the work of keeping the main provincial highways in operation during the winter months will be regarded as almost as important as keeping them in good repair during the summer. When this is generally appreciated, it is to be expected that winter maintenance will be handled by a central authority in the interests of efficiency and economy and in order to secure the same power to enforce work in the same way that summer maintenance is carried out on through-travel highways.

In the meantime measures of urban boards of trade, rural municipal councils and road machinery companies are "showing the way" by conducting experimental work the results of which will be watched with considerable interest. Plows, packers, tractors and other forms of machinery are being pressed into service in widely scattered districts in Saskatchewan this winter in an effort to keep the roads to town open. It is reported that some of the methods being adopted call for very little expenditure in machinery and, of course, at this time of the year, labor costs should not be very great.—Saskatchewan Farmer.

Gas Marks For Males

Machine Writes Music

Ever since music has been written, composers have been forced to jot down the notes by hand. Now, however, Katherine Gerson, composer- pianist, has invented a musical typewriter which she claims will supplant the old method. Orchestral leaders and composers can sit at a desk and a piece of music composed as easily as they could play it on the piano.

Blank Clerk—"You are overdrawn \$16, Mrs. Juggs."
Mrs. Juggs (sweetly)—"Very well, charge it."

Want To Learn English

An ambitious taxidriver of Berlin posted a handwritten notice in English between the two front windows of his cab so that his fares, while luxuriously rolling on the back seat, might be read.

"You would oblige me very much by talking English to me. I want to improve my knowledge of this language."—The Driver, Schuster.

GOING DOWN!

PARA SOMBUS HIM

Why should winter, that severe and blustering season, yet be the perennial breeder of a hearty and tingling cheer? To avoid asking you another, you should be told that rigorous colds have been making the chance easy for a resurgent strong faith in itself. The north wind may howl, and we may have snow, but that is no reason for despondency—it is, in fact, a supreme cause for rejoicing in a young strength that does not shrink from 'wintry weather.' It is only fitting that the true content of this rejoicing be faith, should be faith, which for more than 200 winters has been laughing off the chilly threats of winds and ice and snow. Long before the Pilgrim Fathers set foot on Plymouth Rock, the French-Canadian colonists had settled Quebec. Here, through the centuries, the snow-spent carnivals during the months when blizzard and frosty St. Law-

To Explore Northern Area

Expedition To Thelon River District To Be Undertaken

Another chapter will shortly be opened in the history of exploration in Canada's great northland when, some time in January, W. B. Hoar, of the Northwest Territories branch of the Department of the Interior, begins his trip that will last between one year and eighteen months to the region at the junction of the Haybury and Thelon rivers. These two eastwards out of Great Slave Lake and empty into Chesterfield Inlet.

Mr. Hoar's special task will be to carry out a census of the wild life in this country and also, often though, study the migrations of the caribou. His journey has been prompted by reports that musk oxen still survive on the Canadian mainland, and although their numbers are dwindling, there are several herds of them browsing in the neighborhood of the Haybury and Thelon rivers.

Outlawing War

Question Appears To Be A Constitutional One In The U.S.

The New York World says that "it has been suggested" by President Coolidge that an agreement to outlaw war would conflict with our clause in our constitution which gives Congress the power to declare war. It seems rather odd to think, just because a century and a half ago a few men wrote down certain words, that war must go on forever in this world. What it is treasurable to suggest, that even if this constitutional objection should be found to be valid, the constitution itself might be changed in order to permit the establishment of peace."

"Are the prerogatives of congress so sacred, or is the constitution so immutable, that the progress of civilization must cease?"

Ever since music has been written, composers have been forced to jot down the notes by hand. Now, however, Katherine Gerson, composer- pianist, has invented a musical typewriter which she claims will supplant the old method. Orchestral leaders and composers can sit at a desk and a piece of music composed as easily as they could play it on the piano.

Mrs. Juggs (sweetly)—"Very well, charge it."

One By One The Original Leaders Of Bolsheviks Have Been Expelled From Party

The communist party in Russia has just celebrated with much display, its tenth anniversary of its seizure of power in Petrograd. The most remarkable incident in these proceedings is the expulsion, or degradation of a number of the party leaders through whose energy the coup d'etat was made possible on the night of November 1917. Lenin planned, guided, directed; but until the last moment he remained behind the scenes in hiding. It was Trotsky who, in unannounced meetings and conferences, led the public agitation against the Kerensky government. It was he who, as head of the Bolshevik Revolutionary Committee, actually carried out the "coup d'etat." His name was coupled with Lenin's in the early years of the Soviet regime. As commissar of foreign affairs he astonished the Germans by his defiant attitude during the peace negotiations at Brest Litovsk. Later, as commissar of war, he threw himself with extraordinary energy into the work of organizing out of a rabelaisian army, in the end, a deftly led fighting force. He was the Cheka, in cold blood, and was called an enemy of the victors which he did so much to achieve. Trotsky has been expelled from the party and reduced to the miserable status of a common, unprivileged citizen of the Soviet union.

Others who once occupied high positions in the councils of the party have shared, to a greater or less degree, in Trotsky's degradation. Zinoviev, once imperialist, had been secretary of Petrograd and for many years president of the executive of the Communist party. He was expelled from the party and reduced to the miserable status of a common, unprivileged citizen of the Soviet union. Others who once occupied high positions in the councils of the party have shared, to a greater or less degree, in Trotsky's degradation. Cleaning Seed Grain

Need For Greater Attention On The Part Of The Average Farmer

Investigations conducted by the Experimental Farms, have shown the need for greater attention on the part of the average farmer to the proper cleaning and grading of the grain he uses for seed purposes, states the Dominion Cerealist in his latest report. If farming is to be in a perfunctory manner it is not of very great value. The average farming mill, except in the hands of a particularly careful man, will not clean and grade grain as carefully as this should be done.

The seed for next season's grain crop should be prepared in the fall or early winter. If this work is left to the spring it is apt to be done hurriedly and imperfectly. The very best of grain, if prepared in the fall, should be saved and used for seed. The farming mill should be over-seen, and put in good running order and the instructions sent out by the manufacturer with the mill carefully followed. It is not enough to run the grain, it must be cleaned and graded. It should be passed through three or more times if necessary. The first time will remove chaff, dirt and light kernels, and the second time will grade up the seed and secure the most uniform, the plumpest and heaviest seed. If seed grain is not cleaned and graded it is well to examine it closely and give it another fanning if necessary. By exercising this care a substantial increase in yield per acre may be secured which will more than pay for the trouble taken. The report of the Dominion Cerealist may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Alfalfa In Crop Rotation

Proves Most Valuable and Productive Hay Crop

Alfalfa being undeniably a most valuable and productive hay crop, it should constitute a considerable proportion of the hay acreage. The area devoted to it in Canada is rapidly increasing, especially in Ontario where it has become one of the most important field crops. The acreage has increased, however, that, unfortunately, remains productive for a number of years it is not well adapted to short rotations. If the alfalfa is allowed to remain for some years, the percentages of the land given to it become very small. A new method of incorporating alfalfa in a rotation of medium duration is described in a bulletin on "Alfalfa in Rotation," available at the Publications Branch of the Department of Agriculture at Ottawa. It is pointed out that alfalfa may be economically included in such rotation by having one more field than there are years in the rotation. The alfalfa should be seeded down in the most favorable part of the rotation, preferably with a light nurse crop of wheat and on summer fallowed land or following an intertilled crop. The field would then remain in alfalfa until the other crops had completed one cycle of the rotation and a stand of alfalfa could be established in another field. The alfalfa can be most profitably followed in the rotation by some crop that is a heavy feeder on soil nitrogen and requires clean land.

What a Title Will Do

The daughter of one of the richest men in America returned from Europe the other day with her travelling companion and governess, who happened to be a Russian Baroness. Some of the ship's news reporters, catching the title on the passenger list, inquired of the Baroness and asked her to pose for their cameramen.

She was most obliging, and while the hotel's official photographer charged came up.

"I see you're travelling with an American maid," commented one of the scribbles.

Even the prima donna finds it advisable to employ a press agent to sing her praises.

Colonies of African white ants often raise mounds of earth as high as eight or ten feet.

Quebec, the Birthplace of Winter Sports in North America

GOING DOWN!

Why should winter, that severe and blustering season, yet be the perennial breeder of a hearty and tingling cheer? To avoid asking you another, you should be told that rigorous colds have been making the chance easy for a resurgent strong faith in itself. The north wind may howl, and we may have snow, but that is no reason for despondency—it is, in fact, a supreme cause for rejoicing in a young strength that does not shrink from 'wintry weather.' It is only fitting that the true content of this rejoicing be faith, should be faith, which for more than 200 winters has been laughing off the chilly threats of winds and ice and snow. Long before the Pilgrim Fathers set foot on Plymouth Rock, the French-Canadian colonists had settled Quebec. Here, through the centuries, the snow-spent carnivals during the months when blizzard and frosty St. Law-

rence would diminish travel. The snowshoes and the toboggan of the Indian then entered sporting life as did the sled of the Norwegians in later years. On the whole the character of winter sports has changed very little during these centuries. A new vintage of the sled, introduced by J. G. Strathmore, sports architect at the Chateau Frontenac. In this game the player uses bow, arrows and targets instead of clubs, balls and holes. But the outstanding feature of Quebec's winter scene comes in the form of the carnival. These two winters in this period of continued play and infectious good spirits the snow-covered Plains of Abraham, Battlefields Park and the Chateau Frontenac toboggan slides are the main carnival grounds. Thousands of visitors from the United States engage in the sports and in the old Canadian custom of Christmas and the dawn of the New Year. These two winters, in February comes the annual International Dog-Sled Trial. This race of 120 sleds, covered in daily 100-mile stages, attracts famous dog handlers like the young St. Bernard and the young St. Bernard who won last year's trial. These two winters have become North America's sports days of very age and simple youth.

ANSWERS TO LAST WEEK'S QUESTIONS

358. What's the Matter With the Soft Coal Industry?
 There are approximately 9,000

commercial bituminous coal mine in the United States, with potential annual production of one billion tons, while actual consumption is but half that amount. Of the 650,000 miners, 150,000 are men of other vocations residing near the mines, who engage to some extent in mining. Some equitable plan for the enforced temporary closing of unprofitable mines would afford steady work to the 500,000 miners required to produce the annual consumption of 50,000 million tons; and business in and about the neighborhood of the mines so stimulated as to employ the 150,000 men thus eliminated from mining.

359. Where Have U. S. Forests Gone?
 When the Indians roamed America there were 822 million acres of forested land. Much of this has been cut for farm and pasture, farm houses and barns and fences, for cities and suburbs.

for furniture and for countless other uses. About 25 billion cubic feet of timber, in one form or another, are used annually—250 million trees of average size cut from the forests every year, trees that would cover 18,500 square miles—an area equal to all Massachusetts, Connecticut, and New Jersey. Forest fires, decay and insects destroy annually 2 billion feet more. Most of the timber has been cut in the past 75 years, and timber exhaustion is threatened.

360. Present Extent of American Forests?

There are still about 135 million acres of virgin forests, mostly in south and far west—gathered together would make a solid forest belt 70 miles wide, from New York to San Francisco (3,200 miles); also 255 million acres of cut-over land growing trees to some extent, and 80 million acres practically unproductive. Put all this land into one

belt 225 miles wide—distance New York to Washington—and again it would reach New York to San Francisco—3 times area of France, equal to 9 Minnesota, 16 Pennsylvania, 7 Oregon. The United States has in all about 745 billion cubic feet of standing timber.

361. How Forests Are Cut and Milled?

Lumbering is a giant industry. First in the forests are great equipment for cutting the trees and getting the logs to the mills—30,000 miles of logging railroads (greater mileage than most nations have); countless locomotives; donkey engines; tractors, chutes, flumes; dams; canals, tugboats; cableways; aerial trolleys and horses; handled by an army of 200,000 stalwart men, who wrest the heavy bulky logs from their fastnesses in the mountains and swamps and convey them to the gleaming, whirling saws at the mills. Individual

at mills make as much as a million feet of lumber a day—equivalent to 200 5-room houses.

362. Extent of American Forest Industry?

Gives employment to 1.2 million workers; supports 1 person in every 12; loads 4 million freight cars annually, paying \$400,000,000 in freight bills; affords annual wealth production of 4 billion dollars. Besides building 300,000 homes a year, supplies material for 100 industrial groups and 4,500 commodities—railroads use 30 million cubic feet annually; 5 million trees required for telephone and telegraph poles; mining and excavation work consumes 240 million cubic feet; 3 million tons pulp-wood used annually for paper—16 acres of spruce trees required to make the paper for one Sunday edition of a metropolitan paper.

363. How Can the U. S. Assure a Future Forest Supply?

By reforesting its immense ar-

reas of idle forest lands (fitted only for trees) and eliminating the enormous wastage of 9 billion cubic feet of timber annually. Annual growth of U. S. forests is 6 billion cubic feet; annual consumption 25 billion. There should be more efficient logging methods; mills should cut logs with greater care; manufacturers should use more of the off-fall from their main operations; more paper should be made from saw-mill wastage; builders should use short-length lumber (less than 8 ft.) whenever possible; much decay can be prevented by proper treatment; and losses from fire, fungus and insects largely overcome.

364. Where Do U. S. People Get Christmas Trees?

Five million trees are cut down every year for the U. S. Yuletide festival. Cutting, shipping and selling Christmas trees is now an established business, netting the

(Continued on eighth page)

The NEW CAR

INTRODUCING A FINE CAR IN THE LIGHT CAR FIELD

THIS entirely new car surpasses the accepted standards of light car accomplishment, sweeps aside all boundaries of price class, establishes a new standard of acceleration, speed, power and smoothness. Hereafter the following characteristics have been combined only in expensive cars.

Speed—better than a mile a minute.

Acceleration—5 to 25 miles per hour in high gear in 8½ seconds.

Endurance—this car will travel all day at 50 miles per hour without strain on motor or chassis.

Riding comfort—flexible springs and four hydraulic shock absorbers permit comfortable travel at high speed over the roughest road.

Roadability—this car's low center of gravity holds it snugly to the road on an unbanked turn even at high speed.

Power—in deep, loose sand and with the front wheels cramped and from a dead stop, the car will turn in a tight circle, forward or reverse, without effort.

Effective braking—the instant response of mechanical, four-wheel brakes with dual control ensures positive braking for any emergency.

Positive steering control—A relaxed hand on the steering wheel will hold the car steady in loose sand and over bumpy roads. Turning radius 17 ft.

Economy—50 miles per gallon of gasoline, plus the well known economy of Ford car maintenance.

Appearance—coach work of pleasing proportions, tastefully finished in an extensive range of color combinations of durable satin lacquer.

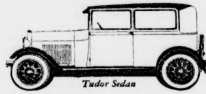

Quietness—Vibration in the engine is practically negligible. New final drive is exceptionally quiet. Doubled-up anti-squeak tape, asphaltum treated fabric and hardwood blocks between body and frame minimize body noises.

Motor

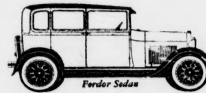

Make and Model—Ford "A"
 Four Cylinders—Bore 3½", Stroke 4¼"
 Unit Construction
 Pump and Thermo-siphon Cooling
 Pump, Splash and Gravity Lubrication
 Single Coil Distributor Ignition
 Sliding Gear 3 speed Transmission

Performance

Acceleration—5 to 25 M. P. H. in 8½ Seconds
 30 Miles Per Gallon Gasoline Consumption

Your local Ford dealer will give you prices and complete details—See him today.

Engine—At 2200 revolutions per minute the new four cylinder engine develops 40 H. P. This revolution speed is low for such power and sets an entirely new standard for light car speed and acceleration, enduring quality and operating economy.

Engine lubrication—Combination of pump, splash and gravity feed thoroughly lubricates all frictional surfaces regardless of road grades.

Cooling system—Combination water pump and Ford thermo-siphon system doubly insures ample radiation. Engine warms up quickly but will not overheat.

Electrical system—The new Ford designed distributor is placed on top of engine permitting direct connection to spark plugs by means of short bronze leads. The single coil is protected by a waterproof case. Co-incidental loss on ignition circuit is their proof. The powerful starting motor and dependable generator are both of Ford design.

Clutch and transmission—Patterned after the famous Lincoln, these units give an operating ease never before found in moderate priced cars. The nine plate multiple dry disc clutch and the selective transmission are designed to make shifting of gears remarkably easy and simple. Getaway, unexcelled by any car made today, is just one of the many advantages. Three speeds forward and one reverse. All gears are made of heat-treated chrome alloy steel. The only light car in which transmission shafts are mounted on ball and roller bearings.

Rear Axle—The axle shaft itself carries no weight as the ½ floating principle places the weight of the car on the axle housing. Flexible roller bearings minimize rear wheel friction. A Torque Tube drive and spiral bevel gear are additional features.

Springs—Transverse semi-elliptic design. Relieved of all driving strain, they perform the sole function of cushioning road shocks. The transverse type of spring helps to prevent a large amount of frame distortion, makes four-wheel brake operation more efficient, gives easier steering and reduces unsprung weight.

Chassis lubrication—Alumite-Zerk pressure system.

Equipment

CLARESHOLM BOARD
OF TRADE ORGANIZED

At the Board of Trade luncheon, at the Wilton hotel on Thursday, Captain Dancker delivered an eloquent address, enlarging upon the desirability of a local Board of Trade, his plea not only embracing the desirability, but also the necessity of such an organization to every live town. At the close of the address those present who were willing to join a Board of Trade were asked to rise, and every one stood up, making it evident that the sentiment was unanimous.

Organization was then proceeded with, and the following officers elected: A. Laurie, president; E. Strangways, vice-president; J. H. R. Thorne, secretary; W. G. Brookes-Avey, treasurer; Board of Directors—G. B. Walker, M. A. H. O. Haslam, Mark Fisher, C. J. Braren, E. W. Brown, R. L. King, C. Milnes, D. L. Reynolds, W. E. Atkinson, and Dr. McMillan. It was understood that the board of directors would be subject to added members.

The annual membership fee was set at \$5.00.

The following, which includes business and professional men, and farmers, were present at the luncheon:

C. J. Braren, F. Ritchie, Roy Marshall, Sheldon Fraser, Dr. McMillan, Dr. Mullin, Bertel Nelson, J. Bowie, G. M. Godley, Dr. Buchanan, W. H. Langston, M. O. Haslam, Glyn Lacey, Rev. Barlow, Capt. Dancker, S. H. Gander, D. A. Anderson, Grant Clark, Mr. Glasgow.

Wm. Knight, J. Wortendyke, A. E. Quilly, J. Dickson, F. H. Schooley, F. Watkins, W. J. McKenzie, Thos. G. D. L. Reynolds, Ed. Strangways, R. L. King, C. W. Stewart, N. Taitenger, O. C. Arnestad, M. H. Arnestad, W. E. Atkinson, Rev. Dalgleish, W. Lewis, G. B. Walker, M. L. A. S. Wyatt, Geo. Simpson, John Amundsen, Claude Amundsen, Adolph Amundsen, E. W. Brown, S. Carey.

J. H. R. Thorne, I. J. Kain, W. G. Brookes-Avey, A. H. Wallis, Wm. B. G. Cooper, Wm. Mackintosh, A. Laurie, M. C. Mogensen, C. Milnes, J. Morkin, P. R. Slipp, C. A. Conlts, O. Kingsley, F. Souck, F. H. Kerr.

Card of Thanks

The officers, non-commissioned officers, and men of "B" Squadron, A. M. R., wish to thank all who so generously donated supplies for the lunch at the military ball on January 20.

E. G. Studd, Major, Comdg. B. Squadron, 2nd A.M.R.

Annual Town Meeting

There was a fair attendance at the annual town meeting Friday evening. A Laurie was chosen chairman.

Secretary Amundsen read the school principal's report which was adopted. The report showed the total enrolment of public and high schools to be 384. The secretary also read the financial report, which was adopted.

Councillor Arnestad, chairman of the electric light committee, submitted the electric light report which called forth a number of relevant questions. The report was adopted.

In the absence of Councillor chairman of the water committee, Secretary Amundsen read the report of this department. Several questions were asked and there was some criticism of work done on the line, only the question whether the water being supplied to consumers at present is filtered, the mayor stated that it is partly filtered. The report was adopted.

The report on the skating and curling rink was a favorable one, and it was adopted.

Councillor Reinecke, chairman of the public works committee, submitted his report, which was adopted.

In the absence of Councillor Anderson, chairman of the fire committee, the secretary read the department report, which was adopted.

In the absence of Councillor Wyatt, chairman of the health, relief and police committee, the secretary read the report. The non-appointment of a health officer for the past year, and other things in connection with the administration of the health department were sharply criticised. The report was adopted.

Councillor Godley, chairman of the finance committee, submitted his report, which showed that the town's finances are in a sound condition. The report was adopted.

Clareholm Leads League

Granum, Jan. 23.—Clareholm invaded Granum and won a close hard fought game of hockey by two goals to one, tying with Granum for first place in the league. Two five minutes periods overtime were played to settle a tie of one goal each. Clareholm winning the odd goal. The game was evenly contested and it would be hard to say which was the better team on the day's play. The result surprised the fans by the great improvement both in attack and defence and will give any team a close run for the league championship.

On the 27th Granum played at Clareholm, in a hard fought game, Clareholm winning in a 6 to 2 score. This victory gave local team in the position of league leaders. For this game the rink was filled to capacity. Supporters of the Granum team were here in force.

Military Ball Social Event

The military ball is always a big social event here, and this year was no exception. The Odd Fellows' hall was taxed to the utmost last Friday night with 350 dancers. The hall was tastefully decorated with the service arms of the squadron, the regimental colors, and variegated streamers.

From outside points there were present Col. Gibson, Col. MacDonald and Lieut. Burton, all of Calgary; Major Jessup of Nanton, Lieut. Miles and Lieut. Nelson of High River. Clareholm was represented by Col. Lyndon, Major Studd, Capt. Tupper, Lieut. W. D. Munro, Lieut. Thos. Murray, Lieut. W. E. Atkinson, Lieut. W. Marsh, and Lieut. W. Brann.

The Blackbird orchestra furnished the music. Refreshments were served at midnight. It was 2 o'clock when the orchestra played the home waltz.

DO YOU KNOW?

(Continued from fourth page)

farmers \$2,500,000 a year, and as much more to the handlers of the output. The economic waste is small; as they come mostly from thinning of forests, from special plantings, and from pastures and overgrown lands outside reforestation zones, where they would

likely succumb to brush fires anyway. New England States and New York supply the Christmas trees for the East, the Lake States and Canada take for the large population centers of the Middle West.

BURNS FESTIVAL WILL
BE HELD JANUARY 30

Members of St. Andrew's Society have arranged a splendid program for the Burns Festival to be held in the Rex theater on Monday evening, January 30th. Monday evening, January 30th. Two comedies will be staged, and the program includes vocal numbers by the best local talent, bagpipe selections, dances and songs by Miss Jean Gauld, and a dance by four local girls.

The first comedy, "The Canceled Bed," is a modern play by Graham Moffat, the scene being laid in a flat in a tenement house in Glasgow. The son and his friends are caught after a convivial night by the unexpected return of the mother and daughter, and the play describes the efforts of the clum to escape from the house without being detected. (Followed by special arrangement with Graham Moffat.)

"The Philosopher of Butterbigg," a character dialect comedy by Harold Chapin, describing the methods employed by the philosopher in getting his own way in spite of the determined opposition of the strong-willed daughter. (Produced by special arrangement with Samuel French.)

Following the program at the theater a dance will be held in the I. O. O. F. hall. There will be several of the old time dances on the program, as in other years.

Canada has one institution at least that compares favorably with anything of the kind the world over. It is that great weekly paper The Family Herald and Weekly Star of Montreal, with its 72 big pages each week of the very choicest material, and all for one dollar a year. It is marvellous how its editors fill its pages with such interesting and valuable news, stories, farm news, and hundreds of other features that please and delight its great army of readers every week. There are thousands of homes in Canada where that great paper, has been a regular visitor from generation to generation. The Family Herald has been a money maker and a money saver to its readers, and one dollar invested in a year's subscription is the best investment any family can make. It is said to have one million readers in the Dominion.

THE WALL OF CHINA

In 214 B.C., the Chinese commenced building the Great Wall, which isolated their country from the rest of the world and helped retard their national progress.

The business man who maintains a wall of "dig-nited reserve" towards the buying public is just as surely reserving his own business growth.

Your advertisement in The Review - Advertiser would be a standing invitation to your store. When our readers open up their paper do they see your "bid"?

"It made the best bread I ever tasted"

That Is What Housewives in Western Canada Say about SPILLERS "BAKE-RITE" FLOUR

A housewife in Sardis, B. C., says: "I have tried your 'BAKE-RITE' flour, baking a large batch of bread, a pan of biscuits and a cake and I found it very satisfactory indeed."

"I have tried every brand of flour on the market and they are not to be compared with 'BAKE-RITE'."

"It was the best bread we have had in the house since before the war. It is not waxy and gluey in the kneading. I found it did not stick to my hands like ordinary flour."

"I must say I was very pleased with 'BAKE-RITE'." (Original letter on file)
